

Technical rider Rock4: “A Night At The Opera” (audio/ stage)

(version 01-12-2017, when driving)

Rock4 needs the following equipment for their performance:

- 1 x Good quality processor controlled FOH system with (18 inch) subwoofers (for example L' Acoustics, Meyer, D&B, EV). must be capable of reaching 103-dBa rms at the mix position, and room covering (processor must be accessible)
 - 2 Cat5E cables FOH to Stage
 - 1 return lines AES50 to speaker processor (if Available)
 - FOH space for a Midas Pro1 with siderack (technician will operate from the middle of the theatre hall)
 - 4 equal, good quality stools / barstools (Barhocker), for Rock4 to use on stage
- The venue is responsible for the lightshow. For the light engineer from the venue, Rock4 will send or bring a detailed light/stage plan for him or her to work with.**

If you have problems to deliver the above equipment, PLEASE CALL US!
